Inclusive Technology of Washington works to close the digital divide and support self-advocacy by providing technology education and resources to underserved communities. Our mission centers on advancing equity in technology for individuals who are neurodiverse, those living in rural populations, girls, minorities, and other socioeconomically disadvantaged individuals. We empower learners with the digital tools and skills they need to thrive in the modern world.

## Community Advocacy Awards

Earn a badge and have the option to work with Inclusive Technology to complete a take action project to earn your Community Advocacy Award and complete the prerequisite for your Bronze, Silver or Gold Award!
